BE WHAT YOU WANT TO BE

At NUV, we believe that students must achieve a good balance of academic productivity and collegial delight through an experience that connects what they do inside and outside the classroom. Students have plenty of opportunities to pursue personal interests with friends while undergoing a rigorous education, and make time at the University rich, substantial and fulfilling. Student life at Navrachana University is vibrant and thriving with a variety of events round the year. In addition to academics, field trips and educational tours, NUV students are active around and beyond campus. Whether students are playing through the NUV Sports Club or cheering for friends, they are always busy participating and directing cultural events, organizing and attending Guest Lectures, participating and managing Workshops, administering and directing Quizzes, or participating, managing and organizing Extra-curricular activities-they are always busy.

To pursue personal interest, there are several student-run clubs like the Automates@NUV, Business@NUV, Engineering@NUV, Management@NUV, ScienceIT@NUV, Music@NUV, Dance@NUV, Theatre@NUV, Computers@NUV and Design@NUV that allow education to flourish with other interests.

School of Environmental Design and Architecture

NAVRACHANA UNIVERSITY

Navrachana University is a UGC approved University meeting norms and requirements of UGC and AICTE. Navrachana University comprises four schools offering a variety of under-graduate, post-graduate and doctoral programs. Some of the salient features are:

Student-centric education with a focus on inter-disciplinary learning, research, practical learning and hands-on education

Strict adherence to academic schedule and on-time examinations

Develops students with breadth of understanding through inter-disciplinary education and a depth of knowledge through focused disciplinary education

State-of-the-art infrastructure facilities: Wi-Fi enabled campus; well-equipped library; modern laboratories for computer, engineering, and sciences; workshop facility for engineering, architecture and design students; well-equipped studios for design and architecture students; a computer-aided language laboratory; moot court for law students; amphitheatre and cafeteria.

School of Environmental Design and Architecture

The School of Environmental Design and Architecture (SEDA) is at the cutting-edge of ingenuity and it provides a dynamic and challenging environment for students to study architecture and design and fosters creativity, critical thinking, intellectual development, ability to respond to our natural environment and cater to spatial needs and aspirations of individuals and the society. The School has been established to offer broad-based Design Programs with focused education to meet the challenges of the design profession. The following degree programs are offered by SEDA.

- Bachelor's Program in Architecture (B. Arch.)
- Bachelor's Program in Landscape Architectural Design (BLAD)
- Bachelor's Program in Interior Design (B. Design)

Bachelor of Landscape Architectural Design Program (BLAD)

The Bachelor course in Landscape Architectural Design (BLAD) is a full-time four year degree program. It deals with design and planning of Landscapes at various levels, from domestic to regional.

The discipline of Landscape is concerned with design of Physical environment, similar to courses like B.Arch. and B. Design. It offers opportunity to shape not only the manmade environment the but also the natural environment. It is complementary to the discipline of Architecture and shares several common concerns. Hence, there are multiple collaborative possibilities offered between the two courses in form of studios and other subjects.

The Bachelors degree programme in Landscape Architectural design offered at Navrachana University is the first of its kind in India. The programme intends to fill the gap in the rising profession of landscape architectural design with the professionals having practical knowledge and creative ability to design.

The salient features of the programme are,

- Deals with design and planning of Landscape spaces at various levels, from domestic, collective to regional
- Multi-disciplinary course- combines sciences, humanities and technology with creative approach to space and form
- Integration with Bachelor of Architecture program in form of foundation year and collaborative studios offered at various levels
- Graduates who are equipped with the practical knowledge
- Ready professionals to undertake projects on their own at the end of the program
- Greater employability of the professionals
- First of its kind in India, offered only as Masters level course for architecture graduates elsewhere in India
- According to the experts in the field, the bachelors program is more suitable to train landscape professionals
